

SANCTIONS FOR NON COMPLIANCE WITH SLOT ALLOCATION RULES (SLOT MISUSE)

Misbehaviours identified as violation of the authorized slots or which go against the relevant regulations can lead to the application of different corrective measures or sanctions. These penalizing measures or sanctions, in cases of violation of the slot regulations, can be of two types: slot coordination measures, or administrative measures.

Slot coordination measures

These are the corrective measures or sanctions adopted by the Slot Coordinator as part of its monitoring duties. More information is available in the national slot coordination site: <http://www.hasca.gr>

Administrative measures

These are monetary sanctions or operational measures imposed by the relevant authority (HCAA) for the breach of the established regulation (Airport Regulation No 4) on slot allocation. The economic amounts per misuse are set out in the Ministerial Decision HCAA/D3/B/ 30633/9932/25-11-2015 «Establishment of penalties level, relevant sanctions, and the procedure of their imposition upon violation of Airport Regulations Nr. 1, 2 and 4» (GG/B/2631/7-12-2015), for the Greek coordinated airports, complies with the provisions of Article 14.5 of EEC Regulation No 95/93 as amended.
